Office Action Summary

Serial No. 09/383916
Art Unit 1644

DETAILED ACTION

1. The location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1644, Technology Center 1600.

2. Applicant's amendments, filed 8/26/99 (Paper Nos. 2/3), are acknowledged.

Claims 2-15 have been canceled.

Claim 16 has been amended.

Claims 1 and 16-20 are pending.

3. Applicant's submission, filed 8/26/99, has placed this application in compliance for patent applications containing nucleotide sequence and/or amino acid sequence disclosures.

4. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-, drawn to B7.1-/B7.2-specific antibodies; classified in Class 530, subclass 387.1.

II. Claims 16-20, drawn to a method of treatment with B7.1-/B7.2-specific antibodies, classified in Class 424, subclass 130.1.

5. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)).

In the instant case, the product(s) as claimed can be used in a materially different processes such as affinity purification procedures or detection assays.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Groups I and II have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

Serial No. 09/383916
Art Unit 1644

7. This application contains claims directed to the following patentably distinct species of the claimed Groups I/II: wherein the antibody specificity is:

- A) B7-1,
- B) B7-2 or
- C) B7-1 and B7-2.

These species are distinct because the antigen specificities differ in structures and physicochemical properties. Therefore, they are separate and patentably distinct species

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 16 are generic.

8. In addition to Section 7 above ; this application contains claims directed to the following patentably distinct species of the claimed Group II: wherein the disease is:

- A) autoimmunity or
- B) GVHD.

These species are distinct because their etiologies and therapeutic endpoints differ. Therefore, they are separate and patentably distinct species

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 16 is generic.

9. In addition to Section 8 above ; this application contains claims directed to the following patentably distinct species of the claimed Group II: wherein the autoimmune disease is:

- A) ITP,
- B) SLE,
- C) diabetes
- D) arthritis,
- E) psoriasis or
- F) multiple sclerosis

These species are distinct because their etiologies and therapeutic endpoints differ. Therefore, they are separate and patentably distinct species

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 16 and 18-19 are generic.

10. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (703) 308-3997. The examiner can normally be reached Monday through Thursday from 7:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 305-3014.
